PORTABILITY & PRIVACY PROTECTION CONFERENCE - STANDARDS AND GOVERNANCE

10 APRIL 2019 – 19pm | www.privacytech.fr

24 February 2019

Dear Esteemed Colleagues,

On behalf of Privacytech it is our honor to extend you this special invitation and request the pleasure of your company at **Assemblée Nationale 126, rue de l'Université - 75007 PARIS (France), 10 April 2019**, for the Portability and Privacy Protection Conference, under the patronage of Paola Forteza, Member of Parliament, Député des Français établis hors de France.

RSVP by March 22nd to olivier@onecub.fr.

Further details including access procedure to the Assemblée Nationale provided closer to the event.

Purpose

Attendance is composed of guests from all over Europe and is supported by a cross section of Europe's leaders of the data ecosystem in the public sphere, impact innovators, data associations representatives, academic actors and executive business leaders (across sectors). An efficient and ethic digital economy requires personal data to flow seamlessly and under the individuals' control. GDPR is a major leap forward towards this new user centric economy and supports the EU Digital single market strategy that aims at creating conditions for such an economy, at the benefit of people, businesses and the entire society. Almost a year after GPDR, many initiatives, especially in Europe, aim at providing new tools, good practices and standards for data circulation and protection. But there is still much to do, especially in the domain of users' control & portability where we need a new approach tied with an ambitious international cross-expertise, cross-industry coordination to succeed. In such a context, we propose to open-up constructive exchanges around the circulation and protection of personal data in the EU and further afield.

Time	Program
18:30pm	Security, Coat Check & Welcome. Hosts appreciate guests arrive promptly with ID, due to security & protocols.
